

Communal sections with the largest estimated change in population between 01 Nov 25 - 30 Jun 26

Department	Communal section	Population estimate Jun 2026	Trend type in the last 12 months	Estimated change over the last 12 months
West	2e Section Morne l'Hopital	177,300	Increasing	9,820
West	1re Section Turgeau	479,600	Decreasing	-9,420
Artibonite	2e Section Bois Neuf (Saint-Marc)	64,200	Decreasing	-3,560
West	5e Section Bellevue Chardonniere	280,500	Increasing	2,970
West	1re Section St Martin	498,900	Increasing	2,660

Key observations for the period 01 Nov 25 - 30 Jun 26

- **NOTE: The Flowminder-Digicel pipeline was interrupted from June to October 2025, with no data currently available for that period.**
- **NOTE: Due to partial and low population coverage of the data used by Flowminder, the estimates shown in this report may contain biases. Particularly for the departments Artibonite, Centre and North-East and North-West, data is available only for a small number of sections.**
- In the Port-au-Prince Metropolitan Area (ZMPAP), the population continued to increase between November 2025 and June 2026 in 5e Section Bellevue Chardonniere (Pétion-Ville) (+2,970). Between May and June 2026, the estimated population decreased in 2e Section Morne l'Hôpital (Port-au-Prince), while it remained stable in 1re Section Turgeau (Port-au-Prince) and 3e Section Etang du Jonc (Pétion-Ville).
- In West outside ZMPAP, the largest population decrease was in 9e Section Bizoton (Carrefour) (-1,770).
- In South, the estimated population of 1re Section Bourdet (Les Cayes) increased further from May to June, reaching +2,360.
- In South East, the estimated population has declined by 3,000 since November 2025, with the largest continuing decrease in 4e Section Fond Jean Noël (Marigot) (-1,020). The estimated population 6e Section Montagne La Voûte (Jacmel) fell by -1,470 from November 2025 to June 2026, though it showed a slight increase between May and June 2026. The population continued increasing in 1re Section Bas Cap Rouge (Jacmel) (+1,410), while the estimated population in 10e Section La Vanneau (Jacmel) remained stable between May and June 2026 .
- In Grande'Anse, the estimated population declined in 1re Section Basse Voldroque (Jeremie) (-1,670) between February and June 2026.

Cumulative estimated population change by departments and communal sections between 1 Nov 2025 and 30 Jun 2026

These population estimates come from Call Detail Records (CDRs) (mobile phone usage data) and other datasets for reference and adjustments. The estimates provided are not survey estimates, key informant estimates or field observations. If you are unfamiliar with this data source please read our documentation which can be found at www.flowminder.org

Authors And Funders

This report was authored by the Flowminder Foundation.

This work has been made possible thanks to funding from Haiti's Fund for Economic and Social Assistance (FAES), the Inter-American Development Bank Group (IDB Group), and the William and Flora Hewlett Foundation.

Acknowledgements

This study was made possible thanks to the anonymised (aggregated) Call Detail Records provided by a mobile network operator in Haiti.

How to use this report

We provide population estimates that take into account population movements within Haiti, per month and per communal section. We report the average decreasing/increasing trends for each communal section for which we have data. However, it is important to note that multiple trends can be observed over the reported 12-month period. The current crisis has led to large population movements, particularly of internally displaced people (e.g. [IDM round 5](#)), which can result in population statistics becoming outdated over a few months, and therefore impairing preparedness efforts (e.g. hazard population exposure estimation, needs assessment, service and contingency planning).

Indicators presented

Modelled change (trend): the predicted population change for the reporting period from all 12 monthly estimates, which smoothes out monthly variations (linear regression).

Estimated change: the difference in the estimated population between the first and last months of the 12 month reporting period, which does not reflect any monthly variation within.

For communal sections with fewer than 10 months of resident estimates during the reporting period, we do not make a trend classification (insufficient data). For monthly population estimates at the department level, we carry forward the latest estimate to fill missing months in a communal section so that the aggregated changes at the department level are only based on observed CDR-derived mobility.

For communal sections with fast changing populations, we categorised them as 'increasing', 'decreasing', 'stable', when there is little to no change, or as 'fluctuating' when large month-to-month changes prevented us from detecting a trend.

Report's data

This report uses our v4.0 dataset ([documentation](#), [release notes](#)), available at <https://haiti.mobility-dashboard.org>.

This report and its contents may only be shared with attribution to the Flowminder Foundation and Digicel Haiti. Adaptation is permitted as long as the changes are indicated and the Flowminder Foundation and Digicel Haiti are cited. Use of the report and its contents is limited to humanitarian and development purposes.

Disclaimer of Warranties and Limitation of Liability: To the extent possible, Flowminder and Digicel offer this report and its contents as-is and as-available, and make no representations or warranties of any kind concerning this report and its contents, whether express, implied, statutory, or other. This includes, without limitation, warranties of title, merchantability, fitness for a particular purpose, non-infringement, absence of latent or other defects, accuracy, or the presence or absence of errors, whether or not known or discoverable.

To the extent possible, in no event will Flowminder or Digicel be liable on any legal theory (including, without limitation, negligence) or otherwise for any direct, special, indirect, incidental, consequential, punitive, exemplary, or other losses, costs, expenses, or damages arising out of the use of the report or its contents, even if Flowminder or Digicel have been advised of the possibility of such losses, costs, expenses, or damages. The disclaimer of warranties and limitation of liability provided above shall be interpreted in a manner that, to the extent possible, most closely approximates an absolute disclaimer and waiver of all liability.

These population estimates come from Call Detail Records (CDRs) (mobile phone usage data) and other datasets for reference and adjustments. The estimates provided are not survey estimates, key informant estimates or field observations. If you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Data privacy & governance

No personal data, such as an individual's identity, demographics, location, contacts or movements, is made available to the government or any other third party at any time. All results produced by Flowminder are aggregated results (for example, subscriber density in a given municipality), which means that they do not contain any information about individual subscribers.

This data is fully anonymised. This approach complies with the European Union's General Data Protection Regulation (EU GDPR2016/679). Data is processed on a server installed behind the mobile network operator's firewall in Haiti, and no personal data leaves the operator's premises.

Data considerations

The estimates shown are our best current assessment of movements. However, there are a number of uncertainties. The information should be interpreted together with other available evidence.

For more information about our methods, please read our Haiti Mobility Data Indicators documentation on residents and relocation at [here](#).

Data Sources

- Pseudonymised Call Detail Records: Digicel Haiti
- CDR-based data products: Flowminder
- Phone survey data: [HT PS 2023](#)
- Field survey data: [MSNA 2022](#) and [MSNA 2024](#)
- Population estimates: [UN data](#); IHSI 2015; and IHSI 2020.

NOTE: The Flowminder-Digicel pipeline was interrupted from June to October 2025, with no data currently available for that period.

NOTE: Due to partial and low population coverage of the data used by Flowminder, the estimates shown in this report may contain biases. Particularly for the departments Artibonite, Centre and North-East and North-West, data is available only for a small number of sections.
